

YASSINE FAIDI

Full-Stack Developer — Laravel / Vue.js

Casablanca-Settat, Maroc | yassinefaidi.dev@gmail.com | linkedin.com/in/faididev | Yassinefaidi.com

open to relocation

PROFESSIONAL SUMMARY

Full-Stack Developer with 5+ years of experience, specialized in the Laravel and Vue.js ecosystem. Background in software engineering (Bac +3 ENSA Fès) complemented by a degree in private law. Proven track record designing and building business applications (ERP, inventory management, marketplace/booking platforms, multi-role dashboards) for startups in Morocco and the Gulf region. Comfortable owning the full development lifecycle: backend architecture, REST APIs, frontend integration, and deployment.

TECHNICAL SKILLS

Languages & Frameworks: PHP, Laravel, Vue.js, Inertia.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend & Databases: REST APIs, MySQL, MVC Architecture, Filament PHP, Docker, Laravel Sail

Tools & Practices: Git/GitHub, WordPress, Linux, Multi-role Dashboard Design, Business Management Systems (ERP/CRM)

Core Strengths: Critical Thinking, Adaptability, Problem Solving, Freelance Project Management

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Freelance / Stockify

March 2025 – Present

Casablanca-Settat, Morocco

- Designing and building Stockify, a business management platform for the Moroccan retail market, covering the full order lifecycle from creation to delivery.
- Built inventory, stock, and tax reporting management modules.
- Developed real-time cash flow tracking (money in and out).
- Implemented product profitability tracking to reduce losses and increase margins.
- Delivered parallel freelance engagements for various clients on custom Laravel/Vue.js projects.

Full-Stack Developer — Nosghy (نصغي)

June 2024 – March 2025

Casablanca-Settat, Morocco

- Built the Nosghy platform, a consulting app connecting clients remotely with therapy specialists.
- Built the booking API, matching clients to specialists based on location, specialty, and cost.
- Developed dashboards for clinics and admins with multi-role support.

Full-Stack Developer — Debrah

March 2023 – January 2024

Casablanca-Settat, Morocco (full-time role, startup based in Riyadh, Saudi Arabia)

- Built new features and improved existing ones on the admin dashboard of a delivery app connecting shops, restaurants, drivers, and customers.
- Added new features to the APIs used by the delivery and customer apps.
- Applied Laravel skills alongside front-end expertise gained from previous experience.

Frontend Developer — Freelance / Rakena

February 2021 – April 2023

Casablanca-Settat, Morocco (freelance engagement for a startup based in Jazan, Saudi Arabia)

- Built landing pages and front-end interfaces using HTML, CSS, and Bootstrap for a Talabat-like delivery app.
- Improved the UI/UX of the admin dashboard.
- Integrated views into the Laravel project using Blade — first hands-on experience with Laravel.

Frontend Developer — Freelance

January 2020 – January 2021

Casablanca-Settat, Morocco

- Built front-end for apps, websites, and landing pages from scratch using HTML, CSS, jQuery, and Bootstrap, ready for backend integration (Laravel, Symfony).
- Created and customized WordPress themes for agency, e-commerce, and business websites.
- Optimized site speed and SEO.

Web & Graphic Designer — Freelance

June 2018 – December 2019

Casablanca-Settat, Morocco

- Converted XD and Photoshop designs into HTML, CSS, and jQuery.
- Built and customized WordPress websites, including performance optimization.
- Designed and coded landing pages; created brand identities for small companies.

EDUCATION

Bachelor's Degree (Bac+3), Software Engineering
